

There are legends that the highlanders threw a piece of logs with the date and place engraved into the lake and threw it into the water. After some time in Italy, in the city of Trieste, a piece of tree was fished, which came from the marsh on the Romance. Another legend has it that a horse drowned in it and no one was able to save it from the depths of water.

- This year I went to the mountains with my family. We entered the Polish sewn called "Grabowa Chata". The views from this site were wonderful. It didn't take us a long time to go up.

Now I will show you some pictures from my trip. In the first photo we can see the beautiful Beskid mountains, the views were really wonderful. Then I decided to sit on the grass and watch the views.

Now a few interesting facts about the Beskids. The Beskids are 600 km long, stretching from the Czech Republic to Ukraine. A total of 11 national parks have been established in the Beskids. The Crown of the Polish Mountains is a list of 28 peaks of individual mountain ranges in Poland, and Babia Góra and Skrzyczne occupy the second and eighth place respectively.
