## EXPLANATION

### The wadden sea

How do you get there. By boat to Terschelling

The express service leaves three to five times a day. The regular ferry service to Terschelling departs from Harlingen, sails at least twice a day and takes about two hours. In the summer season there are extra departures. You will find all the details on the Rederij Doeksen website. The Wadden Sea is the inland sea between the Wadden Islands and the North Sea on the one hand, and the mainland of the Netherlands, Germany and Denmark on the other. The area stretches between Den Helder in the Netherlands and Esbjerg in Denmark, has a length of 500 km and an average width of 20 km.

## EXPLANATION

### The port of Rotterdam

The port of Rotterdam is the largest port and industrial complex in Europe with a total cargo throughput of 470 million tons in 2019. It consists of a combination of various port basins and industrial sites that serve the supply and removal of goods from the (petro)chemical and other industries located at the ports, and the storage and transshipment of goods from third parties for further transport. Rotterdam was the largest port in the world between 1962 and 2004, but this position has been taken over by Shanghai. Singapore, Canton, Qingdao, Port Hedland and Tianjin have also surpassed Rotterdam as a port in size. However, Rotterdam is still by far the largest European port.

## EXPLANATION

### The mesh hedges

The mesh hedges are intertwined hedges. They are also very practical because they collect silt during high water. They used to serve as a barricade for the Roman Julius Caesar. Later, barbed wire was invented and the mesh hedges were no longer needed as barricades. Now they serve more as a landmark.

### EXPLANATION

#### De Nederlandse waterlinies

There are about 30 large and 25 small forts in the New Dutch Waterline. Also 5 fortified towns and castle fortresses Loevestein and Muiderslot are part of the New Dutch Waterline. During the First World War and just before the Second World War I there are about 700 reinforced concrete group shelters and 80 machine gun casemates built. There are also 95 locks. The Old and New Dutch Waterline is actually one and the same waterline. It The big difference is that the New Dutch Waterline is located more to the east of the Netherlands and that the important garrison city of Utrecht lies within the line.
